

## Product Updates Data Clarity

### 1. Integrating with TIBCO ActiveMatrix BusinessWorks

TIBCO Clarity provides a set of RESTful APIs. You can call these APIs using TIBCO ActiveMatrix BusinessWorks to upload files to TIBCO Clarity, apply operations, and download result files from TIBCO Clarity.

### 2. Synchronizing Data to TIBCO Spotfire

TIBCO Clarity supports synchronizing cleansed project data to TIBCO Spotfire just by a simple click.

### 3. Integration with Odata Server

TIBCO Clarity provides a set of interface for the Odata integration, which allows users to import data from external Odata server into TIBCO Clarity and export data as Odata server.

### 4. Integrating with Salesforce and Marketo

TIBCO Clarity provides this function to merge the object records of Salesforce or Marketo by using the de-duplication function. After removing the duplicates, TIBCO Clarity can synchronize data in two or more Salesforce and Marketo instances.
